2000

As the Nation's principal conservation agency, the Department of the Interior has responsibility for most of our nationally owned public lands and natural resources. This includes fostering the wisest use of our land and water resources, protecting our fish and wildlife, preserving the environmental and cultural values of our national parks and historical places, and providing for the enjoyment of life through outdoor recreation. The Department assesses our energy and mineral resources and works to assure that their development is in the best interest of all our people. The Department also has a major responsibility for American Indian reservation communities and for people who live in Island Territories under U.S. administration.

**NOTE:**

Comments, including names and street addresses of respondents, will be available for public review at the Klamath Falls Resource Area Field Office during regular business hours (7:45 a.m. to 4:15 p.m.), Monday through Friday, except holidays. Individual respondents may request confidentiality. If you wish to withhold your name or street address from public review or from disclosure under the Freedom of Information Act, you must state this prominently at the beginning of your written comment. Such requests will be honored to the extent allowed by law. All submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, will be made available for public inspection in their entirety.

**PLANNING UPDATE**

**Spring 2000**

The primary purpose of this update is to keep you informed of activities on the Klamath Falls Resource Area. It is our desire to keep you informed about issues, activities, and opportunities we think are important to our public. More importantly, we are seeking ideas and comments from those who may be affected by our multiple-use management programs.

This planning update has been organized to give you a brief description of activities occurring in several programs. It contains listings of projects that have been completed recently, projects in analysis, and identifies newly proposed projects within the Klamath Falls Resource Area. Additional information can be obtained from the contact listed in the project descriptions. Community presentations by employees of the Klamath Falls Resource Area on resource topics are also listed.

If you have any concerns about the proposed actions, please contact the Klamath Falls Resource Area Project Contact or Planner as soon as possible. The earlier you get involved, the more capability we have to adjust or change planned actions. If you want to provide comments to a specific environmental assessment, please send or deliver your written comments addressed to the Field Manager, Klamath Falls Resource Area, by the close of, or postmarked by the last day of the comment period. Your comments and concerns are welcomed and may influence the final decision on these projects.

We would appreciate any comments or suggestions you may have regarding this planning update or how it could be improved to make it more useful to you.

Thank you for your continued interest in BLM's management of public lands. If you have any questions on information in this planning update, stop by the office or call (541) 883-6916.
